

Hello.

CoverPro 3000 Professional

JANOME®
Reliability by Design

Lights, Lights, Lights!

In addition to the two bright LED lights over the needle (A) and bed (B) of the machine, the CoverPro 3000 Pro has the added bonus of a retractable LED light over the sewing area (C). Greater visibility means easy to see sewing at it's best!

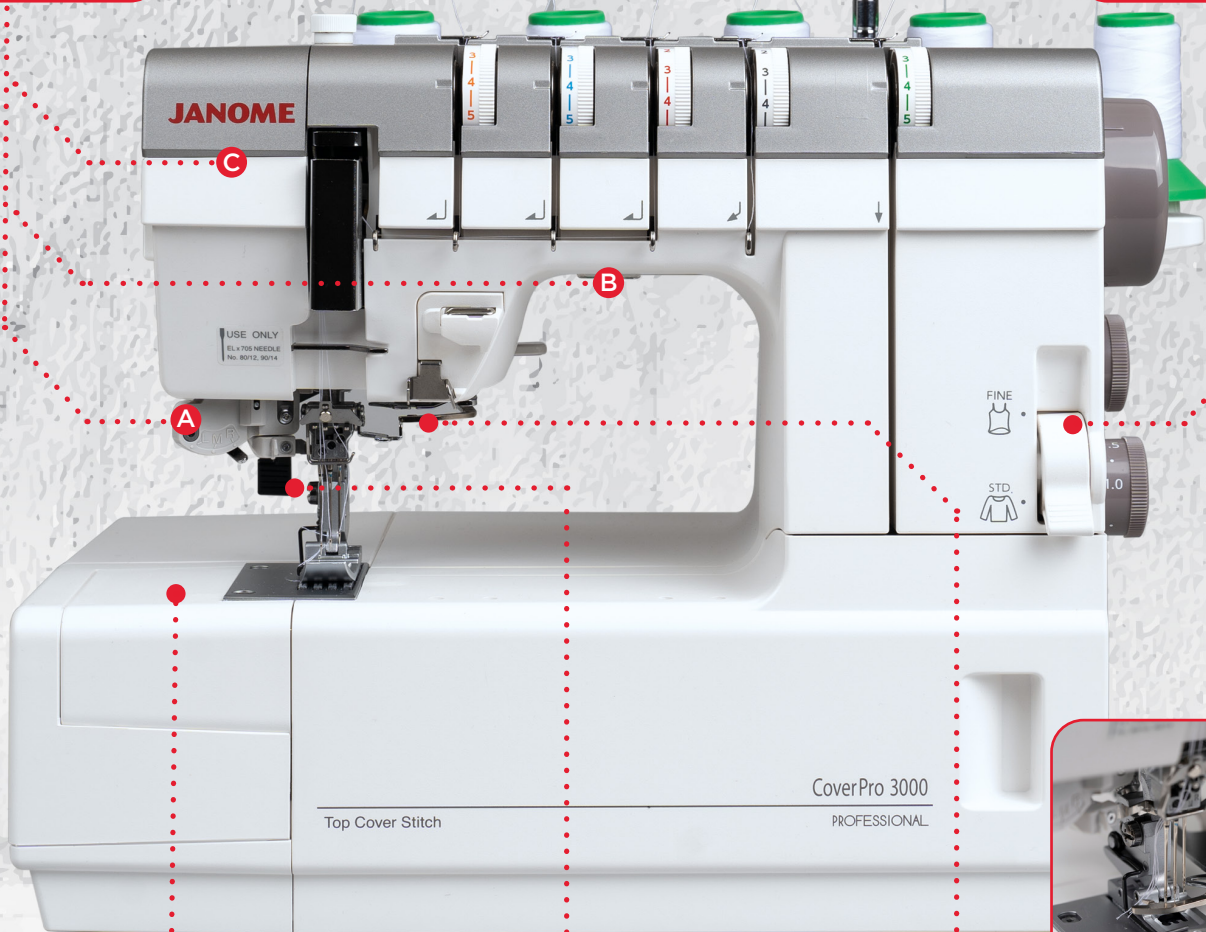

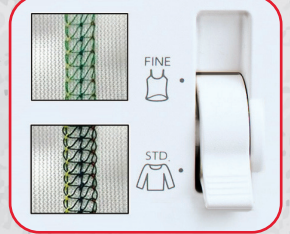

Smooth and Stable

Equipped with a main shaft that uses ball bearings, there is even less vibration for a reliable machine that will last for years. You'll have the power and torque you need to sew through heavier weight fabrics.

Fine Mode Switching Lever

If you don't like playing with tension, then you'll LOVE this feature! Go from heavy knit to sheer home decor fabrics with the swish of a lever. This unique feature automatically softens the looper tension for perfect stitching, taking the guesswork out of adjusting your tensions.

Thread Chain Off

Finishing the end of your top stitch cover hem is easy and fast. As you sew off the end of the fabric, the machine will continue to chain stitch. Ending your hem seams is now quicker than ever!

3-Position Needle Threader

Whether you are using one, two, or all three needles, quickly drop the built-in needle threader into place to thread the needle and you are ready to begin sewing!

Built-in Top Cover Stitch Guide

An industry first! The built-in stitch guide easily swings into place, providing you with a triple or double Top Cover Stitch, that will bring your finishes to the professional level.

BEST FRIENDS: Cut from the same cloth

Built on a foundation of trust, confidence, pride, and everlasting love.

Beautiful bindings, pristine hems, and casings with elastic bands (all in one pass) are done quickly and efficiently with the CoverPro 3000 Pro. That's why it's the perfect addition to your sewing room.

ACCESSORIZE

Learn more about optional accessories that are designed to help you get the most out of cover stitch applications. Go to, www.janome.com/products/accessories/ and then select the "CoverPro" from the Filter By Accessories menu.

What Will a Cover Stitch Machine Do?

Whether a passionate hobbyist or professional sewist, you're always looking for the next step in perfecting your craft. The **CoverPro 3000 Pro** is the natural progression of this and complements your sewing machine and serger. Enjoy professional results with your hemlines, utilizing double and triple needle cover stitches, as well as chain stitching that can be utilitarian or decorative depending upon your desired application, all while benefitting from the ease-of-use that you have come to expect from a Janome.

The 3000 Pro is a three-needle, five-thread model. Enjoy these useful stitches:
